

PIPELINE INTEGRITY SOLUTIONS

Intuitive inline inspection reporting – at your fingertips.

Designed to quickly and accurately identify pipeline integrity threats, TDW's Interactive Report (IR) allows users to easily navigate inline inspection (ILI) data, filter and plot pipeline features, select key integrity threats and export data to aid in remediation.

Interactive Reporting Software

Pipeline Overview – is an interactive layout of the pipeline and inspection data. Circumferential orientation is on the Y-axis and axial distance on the X-axis. Icons are present for every reported feature and can be toggled on/off, filtered, selected, and navigated to. **Quickly zoom in on an area by drawing a box, double clicking a feature or scrolling the mouse wheel and all views and plots will be updated to the selection.**

Easy one-click icons to generate dig reports, and export screenshots & data

Simply drag to select a pipe area or click on a specific anomaly

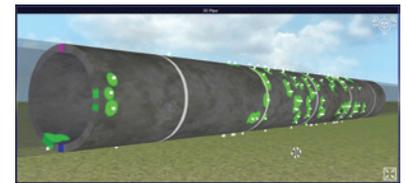

Easily apply filters and toggle through views and graphs based on your selections

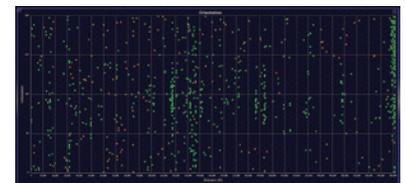

Joint Table

ID	Type	Start	End	Orientation	Depth	Length	...
1000001	Group	1000000.000	1000000.000	0.000	0.000	0.000	...
1000002	Group	1000000.000	1000000.000	0.000	0.000	0.000	...
